👤 PROFESSIONAL SUMMARY

MBA graduate in International Business with practical exposure to marketing, customer communication, business operations, international trade processes and documentation. Experienced in supporting customer follow-ups, supplier/internal-team coordination and routine business activities. Currently building skills in CRM, digital marketing and AI-enabled productivity tools, with an interest in using technology to improve lead management, follow-up and business workflows. Passionate about exploring AI-driven marketing trends and global trade dynamics. Looking forward to build a successful and progressive career in a professional organization where I can apply my knowledge and experience while continuously developing new skills.

<> SELECTED PRACTICAL PROJECTS

Development Approach: AI-assisted development using Antigravity (Vibe Coding)

1. Static Printing Press Website

HTML, CSS, JavaScript

- Designed and developed a responsive static business website with structured sections, modern UI and mobile-friendly layouts.
- Focused on clean navigation, visual presentation and responsive design across different screen sizes.

🌐 **Live:** [<https://manasvi16.netlify.app/>]

2. IT Training Institute Website | Full Stack

React.js, Next.js, Node.js, Express.js, neon Postgres SQL

- Developed a responsive website for an IT training institute with course information, trainer details, contact/enquiry functionality and dynamic content.
- Created backend APIs and database integration for managing website data.
- Designed the website with a mobile-friendly and user-focused interface.
- Implement Gemini LLM & RAG in chatbot.

🌐 **Live:** [<https://nexgen-tech-academy.onrender.com/RL>]

3. E-Commerce Website | Full Stack

React.js, Next.js, Node.js, Express.js, Postgres SQL, REST API, Render

- Developed a responsive full-stack e-commerce website for browsing products, categories, product details, cart and user interactions.
- Built REST APIs and connected the frontend with MongoDB for dynamic product and application data.
- Implemented responsive UI and deployed the frontend and backend and Render.

🌐 **Live:** [<https://my-choise-ecommerce.onrender.com>]

4. HR Workflow Automation | Antigravity

Antigravity, n8n, Google Sheets, Gmail, JavaScript

- Created an HR automation workflow to collect and process employee/candidate information automatically.
- Automated data handling using Google Sheets and triggered email notifications based on workflow conditions.
- Reduced repetitive manual tasks by connecting multiple applications into a single automated workflow.

🌐 **Live:** [<https://nexus-hr-workflow.onrender.com>], [<https://tech-innovations-inc.onrender.com/>]

5. Automatic Email Dispatch Automation | n8n

n8n, Google Forms, Google Sheets, Gmail, JavaScript

- Built an automated workflow to receive form submissions, process the submitted information and automatically send personalized emails.
- Used JavaScript code nodes for data processing and dynamic email generation.
- Designed the workflow to minimize manual email handling and improve response efficiency.

★ KEY STRENGTHS

Communication & interpersonal skills | Relationship building | Analytical problem solving | Adaptability | Team coordination
| Time management | Attention to documentation | Willingness to learn
