CORE SKILLS

Generative AI Tools

ChatGPT, Gemini, Claude, NotebookLM

Workflow Automation

n8n, Zapier, automation concepts

Digital Marketing

SEO, Email, Canva AI, AI-assisted content ideas, market and audience research

AI & Productivity

AI-assisted research, AI related business tasks

Business Applications

Process optimization, productivity improvement, technology integration

Technical Learning

RAG concepts, REST APIs, web development fundamentals

Professional Skills

Quick learning, adaptability, responsibility, consistency, time-management

EDUCATION

Master of Arts (MA) – Economics (2021-2023)

Mata Gujri College, Jabalpur, Madhya Pradesh

Academic distinction: Gold Medalist

Focus Areas: Microeconomics, Development Economics, International Economics, Public Economics, Money & Banking, Macroeconomics

PROFESSIONAL CERTIFICATIONS

- Certification in Advanced Excel
- Certification in Digital Marketing with AI
- Certification in Product and Project Management

STRENGTHS

- Quick learner
- Responsible and consistent

- Positive attitude toward feedback
- Practical learning mindset
- Problem-solving and critical thinking
- Team work

LANGUAGES

- Hindi
- English

VAGEESHA SHARMA

ECONOMICS GRADUATE | MARKETING & RESEARCH | GENERATIVE AI TOOLS & AUTOMATION

PROFESSIONAL PROFILE

MA Economics graduate with a background in market concepts, consumer behaviour, research, currently pursuing Generative AI Tools in Business Analytics, with practical learning in generative AI, workflow automation, AI productivity tools, and business applications. Interested in building a career focused on digital marketing, AI tools, automation, vibe coding, and technology-enabled business operations. Combines an economics foundation in market, consumer analysis, and data interpretation. Interested in starting a career in digital marketing and contributing to marketing and business activities. A quick learner with a responsible and consistent approach, comfortable learning new tools and applying them to practical tasks.

PROFESSIONAL TRAINING

Currently Pursuing Generative AI Tools in Business Analytics

TOPS Technologies, Ahmedabad

Current learning areas:

- Generative AI tools
- Workflow automation and process optimization
- Business-oriented use of AI
- Practical exposure to ChatGPT, Gemini, Claude, Antigravity, n8n, Zapier, Canva AI and NotebookLM, HeyGen

ACADEMIC INTERNSHIP PROJECT

Microeconomic Research Study / Field Study

Jawaharlal Nehru Krishi Vishwavidyalaya, (Jabalpur)

- Conducted field-level data collection and interviews for a rural microeconomic behavior study.
- Analyzed economic data related to consumption patterns and household income.
- Contributed to the preparation of a final research report.

PRACTICAL PROJECTS & AUTOMATION WORKFLOWS

GitHub Link: [https://github.com/sharmavageesha2000-cmd]

A. AI-Driven Full-Stack & Web Development Projects (Antigravity & LLM APIs)

Training Institute Full-Stack Web Platform with AI & RAG

Tech Stack: Next.js, Neon DB (PostgreSQL), Gemini LLM API, RAG, Tailwind CSS

Live URL / Demo: [https://apex-tech-institute.onrender.com/]

- Architected a responsive full-stack training institute portal with dynamic course schedules, curriculum catalogs, and persistent database storage via Neon DB (Serverless PostgreSQL).
- Engineered an AI-powered conversational assistant utilizing Google Gemini LLM API and Retrieval-Augmented Generation (RAG) to provide real-time, context-accurate answers to student curriculum inquiries.

Dynamic Jewelry E-Commerce Website

Tech Stack: React.js, Node.js, PostgreSQL, Express, REST APIs

Live URL / Demo: [https://dream-wear-jewelry.onrender.com/]

- Engineered a fully dynamic, mobile-responsive e-commerce platform featuring interactive product showcases, dynamic filtering, sorting, and seamless shopping cart state management.
- Built robust backend RESTful API endpoints on Node.js connected to a PostgreSQL database for real-time inventory tracking, user inquiries, and transactional data persistence.

Printing Press Static Website

Tech Stack: HTML5, CSS3, JavaScript, fully Responsive Web Design

Live URL / Demo: [https://shree-printing-press.onrender.com/]

- Designed and deployed a modern, multi-page business website tailored for commercial printing services, showcasing print product catalogs, portfolio galleries, and service quotations.

- Delivered a fully responsive user experience across desktop and mobile devices using clean semantic markup, custom CSS layouts, and interactive client-side form validation.

B. Business Process & Operations Automations (Antigravity & n8n)

HR Operations & Employee Onboarding Automation

Tech Stack: Antigravity AI Automation, Prompt Engineering, Notification Routing

Live URL /Website: [<https://hr-smartflow-automation.onrender.com/website/>] | Live URL /HR Dashboard: [<https://hr-smartflow-automation.onrender.com/>]

- Automated end-to-end human resource onboarding workflows in Antigravity, orchestrating automated welcome notifications, document collection tracking, and employee profile setup.
- Configured automated milestone reminders for internal HR stakeholders and candidates, accelerating onboarding turnaround and improving documentation compliance.

Real-Time Inventory Stock Threshold Alert System

Tech Stack: n8n Automation, Webhooks, Inventory Database, Email & Slack Notifications

- Built a continuous inventory surveillance bot using n8n that periodically monitors stock levels against defined safety thresholds across store databases.
- Triggered instant, multi-channel alerts (Email/Slack) with Stock Keeping Unit identifiers and notifies the stock alert via. mail

Debit/Credit Financial Transaction Reporting Mailer Bot

Tech Stack: n8n Automation, PDF Generation Engine, SMTP Email Automation

- Developed an automated financial pipeline in n8n aggregating daily debit and credit transactions across banking/ledger records and calculating reconciled balances.
- Programmatically compiled an audit-ready, structured PDF financial summary and automatically dispatched scheduled email reports with the PDF attached directly to the business owner.

CAREER OBJECTIVE

To begin my professional career in an AI tools, workflow automation, business technology or related role where I can use my current knowledge, develop strong practical skills, contribute to business processes, and grow into a capable AI and automation professional.
