PROFESSIONAL SUMMARY

AI & Workflow Automation Specialist with 4 years of experience designing, implementing, and optimizing business automations using n8n, REST APIs, webhooks, JavaScript, Python, and AI/LLM services. Experienced in building end-to-end workflows for HR, lead management, customer support, document processing, notifications, and data synchronization. Strong at converting manual business processes into reliable, measurable, and maintainable automated workflows.

CORE SKILLS

Workflow Automation	n8n, workflow orchestration, triggers, webhooks, scheduling, error handling
AI & LLM	OpenAI APIs, prompt engineering, AI agents, document/resume analysis, classification, extraction
Integrations	REST APIs, JSON, HTTP Request, OAuth, webhooks, API authentication, third-party services
Programming	JavaScript, Python, basic SQL, data transformation, regex
Automation Use Cases	HR screening, lead qualification, CRM automation, email automation, document workflows
Tools & Platforms	n8n, Git/GitHub, Postman, MockAPI, Google Workspace, VS Code, Docker basics

PROFESSIONAL EXPERIENCE

AI & Workflow Automation Specialist | TechFlow Solutions

Ahmedabad, India | Aug 2022 – Present

- Designed and maintained 40+ n8n workflows connecting internal systems, APIs, forms, databases, email, and AI services.
- Built AI-powered resume screening workflows that extract candidate information, compare profiles against job criteria, generate match scores, and route shortlisted/rejected candidates automatically.
- Integrated REST APIs and webhooks using n8n HTTP Request nodes, JSON transformation, authentication, pagination, and conditional routing.
- Developed JavaScript/Python transformation logic for validation, deduplication, text processing, scoring, and business-rule automation.
- Implemented automated email notifications and approval flows, reducing repetitive HR and operations work and improving response consistency.
- Added workflow error handling, retries, validation checks, logging, and fallback paths to improve reliability of production automations.
- Collaborated with business and technical teams to map manual processes, identify automation opportunities, and deliver maintainable workflows.

Automation Developer | AutomateWorks Pvt. Ltd.

Remote | Jul 2021 – Jul 2022

- Created API-driven n8n automations for lead capture, customer notifications, data synchronization, and scheduled reporting.
- Connected forms and business applications through REST APIs, webhooks, JSON payloads, and automated email workflows.
- Built reusable workflow components and standardized data validation to reduce manual intervention and workflow failures.
- Used Postman and Git/GitHub for API testing, debugging, version control, and deployment support.

SELECTED PROJECTS

AI Resume Screening & Candidate Selection Automation — n8n, OpenAI API, REST API, JavaScript, JSON

Automated resume intake, text extraction, candidate-to-job comparison, scoring, and HR notification. Configured a 70%+ match threshold for shortlisting, with rejection routing and structured candidate records.

AI Lead Qualification Workflow — n8n, LLM API, Webhooks, CRM/API

Captured incoming leads, classified intent and priority with AI, enriched structured fields, routed high-value leads, and triggered personalized follow-up notifications.

Document & Email Automation — n8n, Python/JavaScript, Google Workspace, APIs

Automated document intake, data extraction, validation, record creation, email generation, and status updates across connected business systems.

EDUCATION

Bachelor of Technology (B.Tech.) — Computer Science & Engineering

Gujarat Technological University | 2017 – 2021

CERTIFICATIONS

• n8n Workflow Automation & AI Automation • Prompt Engineering & Generative AI • REST API & Postman • Python & JavaScript Automation
