PROFESSIONAL SUMMARY

Dynamic and analytical **Business Analyst with 2.5 years of experience** bridging business objectives and technical implementation across fintech and SaaS platforms. Proficient in requirement elicitation (BRD/FRD), user story creation, BPMN process mapping, gap analysis, and Agile/Scrum ceremonies. Demonstrated success collaborating with product managers, developers, and QA teams to deliver enterprise software enhancements on schedule while improving user engagement by 25%.

CORE COMPETENCIES & SKILLS

Requirements & Documentation:	BRD, FRD, SRS, User Stories & Acceptance Criteria (Gherkin/Given-When-Then), Use Cases, RTM (Traceability Matrix)
Process Modeling & Diagramming:	BPMN 2.0, Flowcharts, UML (Activity, Sequence, Class Diagrams), MS Visio, Lucidchart, Miro, Figma (Wireframing)
Agile Tools & SDLC:	JIRA, Confluence, Trello, Agile Scrum/Kanban, Sprint Planning, Backlog Grooming, Sprint Retrospectives
Data & Analytics Tools:	SQL (PostgreSQL / MySQL), Advanced Excel (VLOOKUP, Index-Match, Pivot Tables), Power BI, Tableau

PROFESSIONAL EXPERIENCE

Business Analyst

September 2024 – Present

Apex Global Consulting / Client: Digital Banking Solutions

Pune, India

- Facilitated 30+ requirement discovery workshops and JAD sessions with product managers and business stakeholders to define functional specs for a next-gen digital onboarding module.
- Authored over 80 detailed **User Stories with Acceptance Criteria** in JIRA, maintaining 100% sprint traceability and reducing sprint-level clarification inquiries by **35%**.
- Designed end-to-end **As-Is and To-Be BPMN process workflows** in Lucidchart, identifying procedural redundancy and reducing customer loan origination cycle-time from 4 days to 28 hours.
- Led sprint backlog grooming sessions, assisted the Scrum Master in sprint estimations, and coordinated UAT test case validation with 45+ business stakeholders.

Associate Business Analyst

February 2024 – August 2024

CloudPeak Technologies

Pune, India

- Translated client business problems into comprehensive **BRD, FRD, and data dictionary documents** for a B2B SaaS billing and invoicing platform revamp.
- Created low-fidelity interactive UI wireframes and user flowcharts in **Figma and Miro**, aligning executive clients and engineering leads on feature roadmaps prior to sprint kick-off.
- Wrote ad-hoc **SQL queries** to extract user drop-off telemetry data, helping product leaders prioritize top 5 feature enhancements that yielded a **22% increase in monthly active users (MAU)**.
- Supervised end-user Acceptance Testing (UAT), logged defect tickets in JIRA, and created comprehensive user manuals and training SOPs for client support teams.

KEY PROJECTS

- Digital KYC & Automated Customer Verification Overhaul:** Spearheaded the requirements gathering and workflow redesign for automated video KYC integration. Reduced manual identity verification turnaround by 60% while maintaining 100% regulatory compliance.
- SaaS Subscription & Billing Gateway Migration:** Formulated detailed functional requirement specifications (FRD) and API mapping matrices to migrate payment gateways to Stripe & Razorpay, reducing payment failure rates by 14%.

EDUCATION & CERTIFICATIONS

Bachelor of Business Administration (BBA) / Information Technology

2020 – 2023

Symbiosis International University, Pune | CGPA: 8.4/10

Certifications: ECBA™ (Entry Certificate in Business Analysis - IIBA) • Certified Scrum Product Owner® (CSPO) Foundation • Microsoft Excel Specialist
